AGENDA FOR TELEPHONE INTERVIEW

Sir:

I would like to request a telephone interview on August 26, 2004. Please consider the following proposed amendment:

1. (Proposed): A method for clarifying a document, comprising:
retrieving a document including a document component having an
attribute, wherein the attribute is explicitly specified in the document;
displaying the document;
loading a set of user preferences; and
in response to activation of a clarification control, modifying the
attribute to ~~enhance~~ clarify display of the document based on the set of
user preferences to form a clarified document.

Also, please consider the following topics for discussion:

- Formal drawings were filed on March 18, 2002.
- Neither the allegedly admitted prior art nor IE 5.0 teaches or suggests modifying an attribute of a component of a document to clarify display of the document based on a set of user preferences to form a clarified document in response to activation of a clarification control.

- While the cited portion of IE 5.0 does teach configuring settings for user authentication, there is no teaching of **modifying** an attribute of a component of a document to form a clarified document **in response to** the user authentication.
- Neither Applicants' allegedly admitted prior art nor IE 5.0 teaches or suggests creating an intermediate modified document, as recited in claims 12, 13, and 23.
- Selection of the Tools → Internet Options → Accessibility activates a configuration dialog that allows a user to change preferences. However, the settings are always applied to documents at the time the documents are displayed. In other words, when a document is retrieved for display, the current settings, whatever they may be, are applied to the retrieved document. Application of preferences or settings is not selectable in IE 5.0.

The Examiner is invited to call at the below-listed telephone number to confirm or reschedule the requested telephone interview.
